### Teacher Quotes

"I teach a course called Advanced Chemistry/Biology, which is basically a project-based curriculum. I have quite an assortment of software tools available to me and I count Froguts as one of my most engaging and immersive. It is a powerful simulation that prepares students for actual dissections. And its virtual environment is engaging enough to teach organ recognition and their relationships to each other."

— Charles Murphy, Science, Math & Technology Teacher and Coordinator, Roosevelt High School, St. Louis, Missouri

"I was very pleased to finally find a simulation that can serve as either an alternate or companion to live dissection! Froguts is comprehensive, easy to follow, and the images are extremely clear. I have used this product with my inclusion classes as well as my GT classes — the directions are easy to read and understand and there is plenty of room for extensions and enrichment. This is a must-have for any Life Science or Biology class."

— Hina Naseem, Science Team Leader, Technology Facilitator, Ellicott Mills Middle School, Howard County Public School System, Maryland

## Curriculum

Lessons are systems based, and integrate anatomy, physiology, and ecology through interactive and engaging simulations. Each module starts with external observations and moves from one organ system to the next. Froguts Subscription is appropriate for Middle School, High School, and Higher Education.

## Accessibility **New Voices!**

Each module & lab contains audio narration, and closed captioned text, which is then supported by visual & auditory cues.

## Assessment

Randomized quizzes are integrated between each organ system. Final assessments are employed at the end of each module, complete with printable certificates.

## Interactive Tools

Students will use microscopes, scalpels, injectors, scissors, forceps, x-rays along with our unique 3-D visualization engine.

## Modules

Current specimens on our Subscription CD include : frog, starfish, owl pellet, cow eye, squid, and fetal pig. Additional modules are added each year. Check [www.froguts.com](http://www.froguts.com) for updates.

## System Requirements

Mac OS 9 -OS X PowerPC  
Windows 95 -XP Pentium 3

## Cost

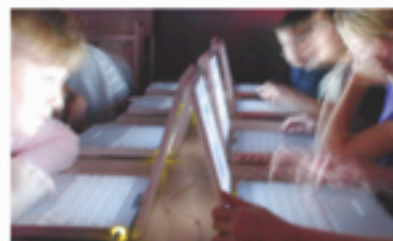

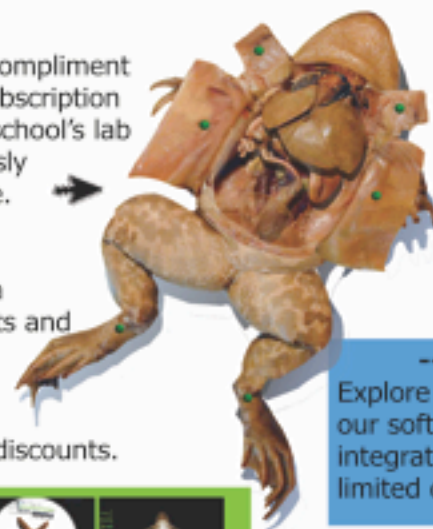

\$300/year provides a single school unlimited use of our service on every computer at that institution. As a **BONUS**, each student and faculty member is also allowed to install the Subscription CD on their home computer!

## Savings

Used as an alternative or compliment to actual dissection, our subscription can significantly reduce a school's lab costs, while it simultaneously boosts student performance.

## Discounts

Multi-year discounts offer a significant savings. Districts and school boards ordering for multiple schools will save too. visit [www.froguts.com](http://www.froguts.com) for discounts.

## Educational Community Service

Froguts Inc. is committed to providing educators with engaging and cost effective tools to enhance learning. Each year we donate a portion of our profits to educational and humanitarian organizations. Additionally we extend access to our software through our international outreach programs.

## Publications

Froguts software has appeared in the New York Times, U.S. News and World Report, Tech TV, Scholastic's Science World, CIO Magazine, and The International Society for Technology Education's [ISTE] Science Units for Grades 9-12 (National Educational Technology Standards for Students Curriculum Series), more...
